ABOUT ME

Hardworking Computer Science graduate and Software Engineer Intern based in Kitchener, ON, Canada, seeking a junior or new graduate software developer position. Passionate about building and self-hosting full-stack applications and integrating LLMs into real-world products, with hands-on experience across the entire development lifecycle.

EDUCATION

- **University of Guelph** Guelph, ON, Canada
Bachelor of Computing (B.Comp.), Computer Science Sep 2023 – Aug 2026

PROJECTS

All projects self-hosted on a homelab (3 machines, Proxmox, Docker, Traefik, Cloudflare Tunnels). See all projects and more about me at www.hugoprado.dev.

- **WatchMage** – watchmage.hugoprado.dev | *Next.js, TypeScript, React*: Mage-themed PC gaming tracking dashboard with dynamic data display and responsive UI.
- **Job Application Tracker** – demo-job-tracker.hugoprado.dev | *React, FastAPI, PostgreSQL, Docker*: Full-stack self-hosted tracker to manage job search pipeline from applied to offer.
- **Rustic Notes** | *Rust, TUI*: Cross-platform terminal notes app as a faster alternative to PICO/NANO with an improved UI.
- **Brazilian Flavors** – brazilianflavors.hugoprado.dev | *HTML, CSS, JavaScript*: Responsive template for a Brazilian food store.

TECHNICAL SKILLS

- **Languages**: JavaScript, TypeScript, PHP, Python, Rust, C, Java, SQL, HTML, CSS, Bash
- **Frameworks & Libraries**: React, Next.js, Svelte, Node.js, Express.js, Tailwind CSS, FastAPI
- **Databases**: PostgreSQL, SQLite, MongoDB
- **Developer Tools**: Git, GitHub, GitHub Actions, CI/CD, Docker, Make, Postman, Gradle
- **Practices**: Software Development Best Practices, Testing, Debugging
- **AI & LLMs**: Claude, Ollama, LM Studio, LLM API integration, prompt engineering, AI-assisted development
- **Infrastructure**: Proxmox, Traefik, Cloudflare Tunnels, Dokploy, Linux server administration

EXPERIENCE

- **Junior Software Engineer Intern** Remote
IDT Jun 2026 – Present
 - Develop and maintain full-stack features across a PHP backend and a Svelte/TypeScript frontend within a containerized Docker environment.
 - Build responsive UI with Svelte, TypeScript, and CSS, and streamline development workflows using Shell scripts and Makefiles.
 - Leverage AI-assisted development tools to accelerate feature delivery, debugging, and code review.
- **3D Printing Business** Kitchener, ON, Canada
toremember.gift – Family-run Personalized Gifts & Keepsakes Nov 2025 – Present
 - Assist a family-run 3D printing business alongside studies: machine maintenance, multi-material printing, order fulfillment, and deliveries.
- **Food Services Team Member** Winnipeg, MB, Canada
Assiniboine Park Conservancy (Zoo) – Seasonal Jun 2021 – Aug 2021
 - Delivered service in a fast-paced, high-volume environment, adapting to different roles daily.
- **Tutor (Volunteer)** Winnipeg, MB, Canada
Grant Park High School 2019 – 2021
 - Tutored exchange students for over 50 hours, helping them succeed academically.
